408-217-4058 | wiz006@ucsd.edu | [linkedin.com/in/willzhngg](https://www.linkedin.com/in/willzhngg) | github.com/wyllz

EDUCATION

University of California, San Diego

Bachelor of Science in Data Science — GPA: 3.75

San Diego, CA

Sept. 2025 - Expected Mar. 2028

De Anza College

Associates in Mathematics — GPA: 3.97

Cupertino, CA

Sept. 2024 – Jun. 2025

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), R

Developer Tools: Git, Jupyter Notebooks, VS Code, Visual Studio, PyCharm, IntelliJ

Libraries: Pandas, NumPy, Seaborn, sklearn, Matplotlib

EXPERIENCE

IDX Exchange

Data Analyst Intern

Sept. 2026 – Present

Remote

- Analyzed MLS real estate data with Python and Pandas

PROJECTS

Spotify Song Popularity Prediction | *Python, Pandas, scikit-learn, Plotly, Github*

May 2026 – June 2026

<https://wyllz.github.io/spotify-analysis/>

- Engineered an end-to-end pipeline **over 114k** tracks: parsed nested genre tags, joined artist followers/popularity data, and reduced multi-genre duplication to 90k unique records
- Developed a random forest regressor GridSearchCV-tuned predicting 0-100 popularity, improving RMSE by **31%** ($29.5 \rightarrow 20.4$) and R^2 from 0.11 to 0.58 over a linear baseline

Image Processing Application | *Python*

Feb 2026 – March 2026

- Developed a multi-tiered image processing application using Object-Oriented-Programming principles
- Implemented complex image manipulation algorithms, including Convolutional Kernels for spatial pixelation logic for image blurring while maintaining a strict $O(n)$ efficiency.
- Created custom distance-metric functions using the Euclidean distance formula to calculate high similarity scores between high-dimensional RGB matrices.

ADDITIONAL EXPERIENCE

Starbucks

Barista

Milpitas, CA

Aug. 2023 - Aug. 2025

- Developed de-escalating solutions to resolve customer frustrations and maintain professionalism
- Delivered personalized service to **250+** customers per shift, created meaningful relationships with customers through small-conversations and remembering standing orders in a store with heavy traffic
- Trained 2 new hires on service standards: coached them through the process of customer interaction, order accuracy, and handling difficult obstacles during peak
